Integration training

If you are an unemployed jobseeker, an integration plan is completed at the Employment and Economic Development Office (TE-services), within 3 years of moving to Finland. You can receive integration training by applying for it at the TE-services.

The aim of the training for adult immigrants is to help them to integrate and adapt to the Finnish society.

In addition to Finnish language studies, the integration training includes studies of everyday-life and life management, information- and communication skills, knowledge of the Finnish society and culture as well as study skills and guiding and preparation for working life.

Integration in Swedish

The integration course in Swedish includes 25 lessons/week, i.e. 4-6 lessons/day. Swedish and social studies include 20 lessons/week altogether. Besides these, you can take some of the other optional subjects. Finnish studies (5 lessons/week) take place together with Swedish.

Swedish, basic course

This course is for you if you want to learn Swedish from the beginning and already know the Latin alphabet. At the end of the course you should be able to manage more easily in everyday situations, understand the essentials of the news and produce shorter texts in Swedish.

Swedish, advanced course

You can participate in this course if you already have basic knowledge of Swedish and want to immerse yourself in the language. The course is helpful for either future studies, work or the language test at the B1–B2 level, which takes place at Arbis in Vasa.
